* This relatively new fluorescing light technology greatly enhances the clinician's ability to discern and identify significant oral lesions; especially pre-cancerous and cancerous lesions or growths.

Special Passion:

Early Detection of Oral Diseases, especially Oral Cancer. This passion provided the inspiration which led to the production of a 35 Minute Instructional DVD titled, "Comprehensive Head and Neck Examination". This video teaches exact protocols for performing and documenting a "Comprehensive Head and Neck Exam, detailing Extra-Oral and Intra-Oral techniques. She also developed a "Laminated Quick Guide" to review chair side detailing each step of the exam. The DVD Package received an outstanding award for: "Best New Product"! The award was from C.R.A., an independent research foundation in December of 2006! The product was featured again in the September 2007 issue of CRA. It was awarded the "Most Notable Product" award for 2007, As: Best "Soft Tissue" adjunct screening aid! It has been featured in these leading publications: DentalTown, Dental Economics, HygieneTown, and CRA.
